Model# Peek7

4MP HD Camera
The device is equipped with a 4-megapixel HD camera with 32x optical zoom and 12x digital zoom.

10 powerful lights
The integrated light cup design features four mid-range and long-range LED high-brightness lights and six low-beam LEDs. It features three different lighting modes: near, medium, and far. Intelligent dimming and energy-saving features ensure clear visibility in near, medium, and far-range scenes.

Professional-grade laser rangefinder
Equipped with a professional-grade, high-precision laser rangefinder module, the device can detect distances up to 120 meters, accurately detecting and locating internal structural damage and defects.

Applicable to multiple pipe diameters
Primarily used for rapid inspection of urban rainwater and sewage pipes, box culverts, and culvert wellheads. Suitable for pipes with diameters above DN150.

Highly integrated design of the main unit
The main body adopts a one-piece molding process, making the device lighter, more impact-resistant, corrosion-resistant, wear-resistant and durable.

Ultra-long battery endurance
Equipped with 3 standard batteries and 3 long-life batteries, you can alternate between them to ensure uninterrupted operation

Module equipped

 Control tablet terminal	 Telescopic pole	 4G gateway
--	---	---

Application scenarios

Municipal rainwater and sewage pipeline inspection

Harsh environment pipeline inspection

Archaeological internal environment inspection

Pipeline repair construction observation

Internal observation of the oil and gas tanker
